POWERING TRANSACTIONS AND INTERACTIONS

SMART Coin System

"Bulk coin feeder, hopper and recycler"

- State of the art bulk coin validator, hopper & recycler
- Lowest cost of ownership
- Eliminates coin starvation
- Market leading coin capacity, acceptance & payout speed
- High security - multi frequency sensing technology

Features

- Combined bulk coin validator, mixed coin hopper & recycler
- Market leading coin hopper capacity, fully audited and efficient refills
- Validates, discriminates and stores mixed coins
- Minimise distance between coin entry and exit points
- Easy maintenance, free firmware updates and data logging
- Closed loop system

Benefits

- Eliminates coin starvation & the need for multiple hoppers
- Reduces operator collection costs
- Improve operator cashflow with mixed denomination payouts - keep machines running
- Allows for space saving new machine design
- Future proof (easy updates via USB, SD card, PC)
- Full audit traceability - no shrinkage

Technical Specification

Power
Requirements: 24V
Standby: 400mA
Running: 3A
Peak: 6.5A

Protocols
SSP
*others on request

Interfaces
USB option
Open collector

Coin Dimensions
Diameter: 16 - 28.5mm
Thickness: 1.65 - 3.2mm

Coin Capacity
1400 (€1) or 1800 (quarters) or 1200 (£1)

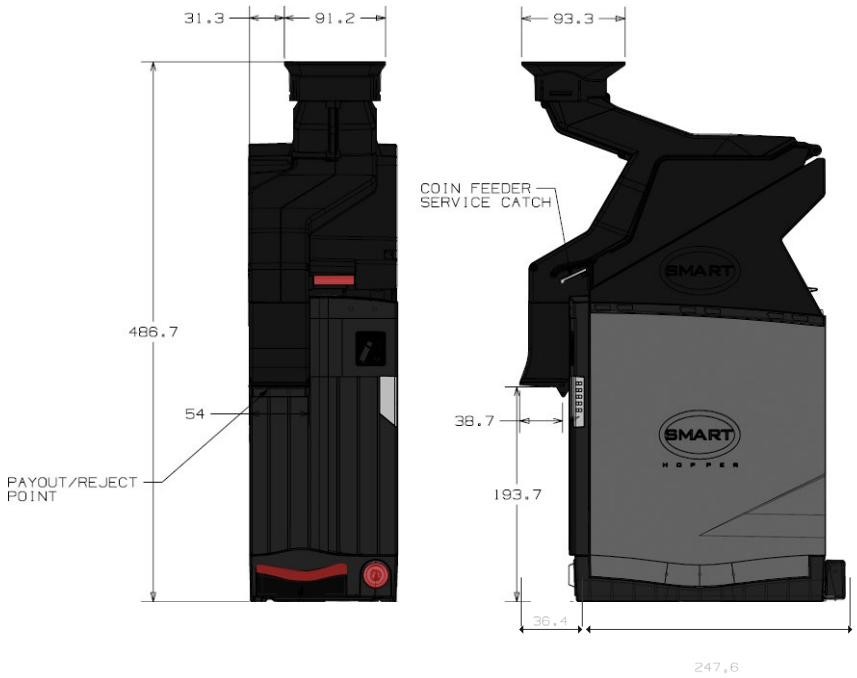
Multiple Denomination
Up to 11 denominations

Mixed Coin Capacity
350 (€2) + 700 (€1) + 200 (50c)

Payout Speed
Up to 10 coins per second

MCBF
100,000

Dimensions



- Weight: 4kg (empty) | 18kg (full)
