# Spectral Payout

"Unrivalled mixed denomination recycler"

- Superior mixed denomination banknote recycler
- 100% note image capture – highest spectral coverage
- Eliminates coin starvation
- Reduce operational collection costs

## Features

- 80 note 'true' mixed denomination recycler - can store all denominations from a given currency
- Full spectral imaging sensors validate the authenticity of notes
- 99% first time acceptance of new and street grade notes
- Accepts notes up to 85mm wide & recycles notes up to 82mm wide
- Notes are transferable to the cashbox for easy collection
- Improved serviceability for easy maintenance, internal memory for data logging and free firmware updates

## Benefits

- Eliminates coin starvation & reduces the coin float levels required to keep machines operational
- Exceptional genuine note detection & protection against fraudulent notes
- Faster note processing and recycling, maximise cash efficiency
- One product suitable for global applications
- Reduces operator collection costs
- Best in class performance & future proof your investment

# Technical Specification

## Power

Requirements: 12V/24V  
Standby: 400mA  
Running: 3A  
Peak: 5.5A

## Protocols

SSP  
\*others on request

## MCBF

100,000

## Interfaces

USB with IF17  
Open collector  
RS232

## Cashbox Options

500 notes  
1000 notes

\*\* Some national currencies differ in thickness and circulation practices. Depending on usage, this can impact cashbox capacities by 10-15%.

## Bezel Options

82 / 85mm width  
Coin resistant  
Self aligning  
Various illumination options

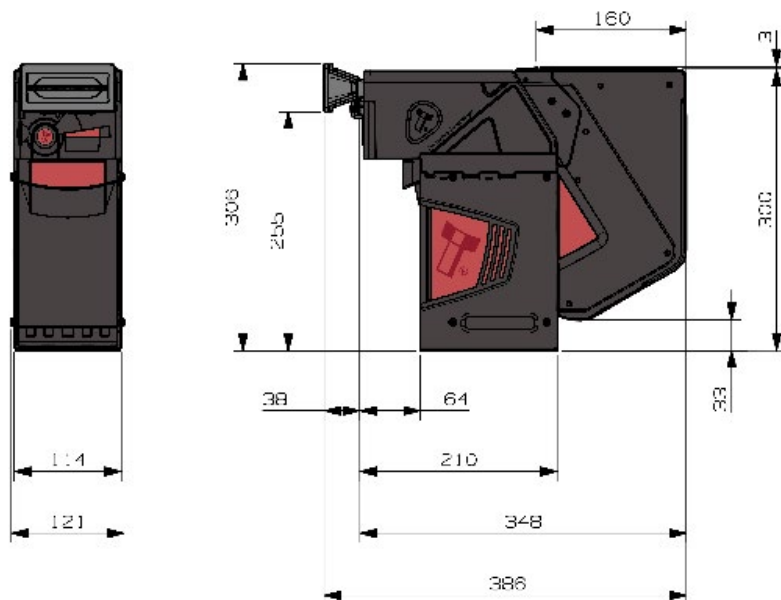

## Note Dimensions

Accepts: Width: 60-85mm  
Length: 115-170mm  
Recycles: Width: 60-82mm

## Recycler Capacity

Up to 80 mixed notes

## Dimensions

- Weight: 5.5kg
